

How to Assign Pearson Content

- 1) Find the lesson where you want to make an assignment.

- 2) Click "**Assign**" under the Video, Game, Quick Check, Lesson Quiz, Practice Buddy, or Math XL you want to assign:

- 3) Decide on a "**Start date**" and "**Due date**" for your assignment. (It is a good idea to give kids about a week to complete each assignment.) In the "**class, group, or student name**" box, start searching your grade or course level by typing in your class name. It should automatically appear for you to click. Then, you will click "**Assign**" in the bottom right-hand corner.

A screenshot of the "Create an assignment" dialog box. The dialog box has a green header bar with the title "Create an assignment" and a close button (X). Inside the dialog box, there are several fields and buttons. On the left, there is a red circular icon with a white checkmark. To the right of this icon is a "Title" field containing the text "Common District Grade 3 Assessment 1". Below the title field are "Start date" and "Due date" fields, each with a calendar icon, and a "to" button between them. Below these fields is a checkbox labeled "Set start and end times" with a question mark icon. To the right of the title field is a large text area labeled "Enter a class, group, or student name" with a question mark icon. Below this text area is a smaller text box containing the placeholder text "Name (for student 'last, first')". At the bottom of the dialog box, there are two buttons: "Cancel" and "Assign".

Here's a helpful video if you need additional specific instructions:
